"Our Mission is to analyse each situation in depth".

WHEN do we intervene?

-**BEFORE** the accident occurs by analysing the preventive measures in place to avoid the accident.

-**AFTER** the event/accident has occurred, in order to understand the malfunctions so that the mistakes of the past can no longer be reproduced.

HOW?

In 2 ways: **On PLACE or REMOTE.**

Thanks to our method of risk analysis combined with our experience in the field, we will work efficiently to provide you with a complete, in-depth and accurate report on the subjects of SAFETY, FIRE and ENVIRONMENT.

And AFTER?

Our report is there to highlight the flaws and the various malfunctions leading to safety events (or almost accidents).

We will give you a detailed account of this REPORT, commenting on it, explaining it to you and providing you with all possible solutions:

-Guiding you in your choices in terms of Safety and Prevention,

-RELATING with the best professionals according to the needs we have detected.

You should know that the flaws we will find in our risk analysis are a real gold mine for you because they will be opportunities for improvement for your organisation.
